

**MERGER
TOOLKIT**

MO

**A Practical Guide for
Charities and Not-for-
Profits**

This toolkit has been developed to assist organisations in undertaking a merger. Mergers can be very rewarding, but require significant time and resources in order to be done successfully. The toolkit reflects our experience and the current literature in the area and has been developed into checklists and tables for ease of use.

Some tips before starting

1. The merger should be in the best interests of members/beneficiaries.
2. A shared vision or goal should be agreed early in the process to provide positive motivation and clarity.
3. The organisations should be compatible in terms of culture and values.
4. Effective communication is vital from the outset – processes, outcomes and requirements of each party must be clear.
5. Identify key roles and responsibilities in the merger process.
6. Anticipate difficulties and develop a process for resolving issues.
7. Ensure that there are sufficient resources to meet agreed deadlines (resources are often underestimated).

Merger Integration Process

1. Concept Phase

1.1 Summary of Merger Options

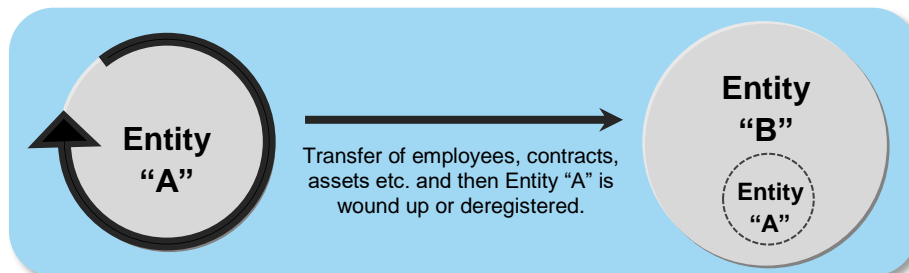

Option 1 – Entity “A” subsumed by Entity “B”

Entity “A” agrees to transfer all of its property, employees, contracts, assets etc to Entity “B” (i.e. becomes subsumed by Entity “B”) and then Entity “A” ceases to exist. The end result is that only one organisation remains, which is Entity “B”.

Before

After

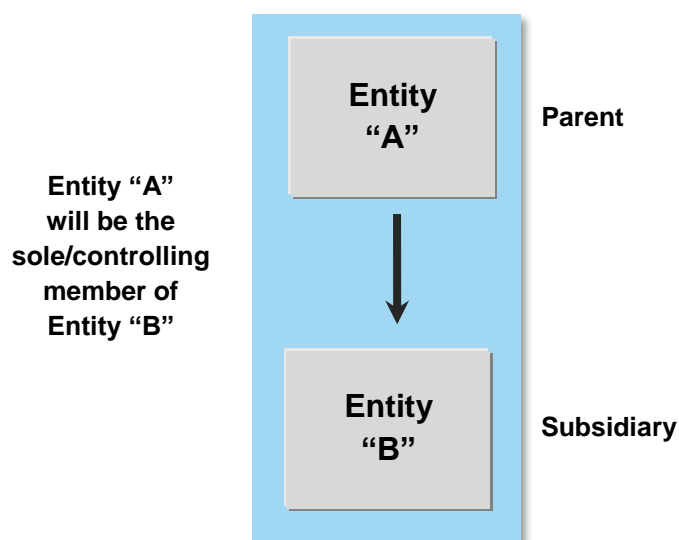

Option 2 – Entity “B” as subsidiary

Entity “B” can change its structure so as to have Entity “A” as the controlling (and/or sole) member of Entity “B”. The result is that Entity “A” becomes the parent of Entity “B”, and Entity “B” becomes the subsidiary of Entity “A”. This means that the end result is that both organisations remain in existence and generally have separate legal liability.

Before

After

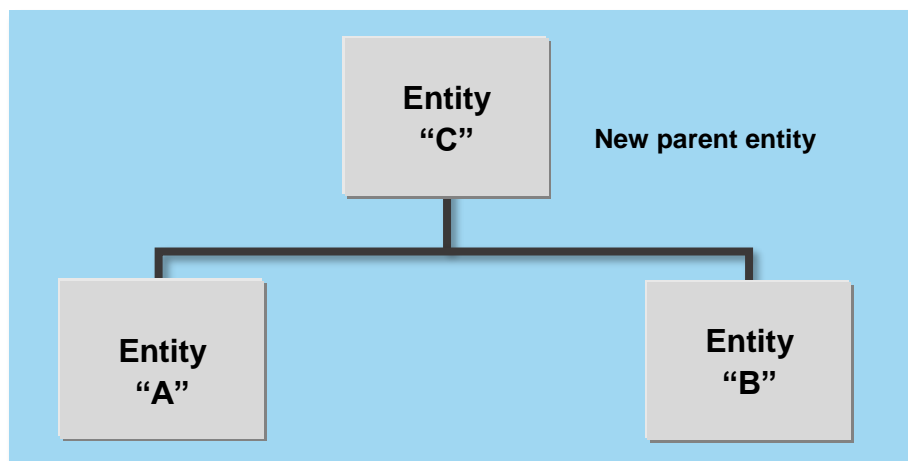

Option 3 – New parent entity

Create a new parent which sits above both Entity “A” and Entity “B”. This has the end result of both organisations remaining in existence, without one organisation feeling as if it has been “taken over” by the other. It is also most suitable where both Entity “A” and Entity “B” are of a similar size, meaning it is not appropriate for one entity to become the parent of the other (which is option 2 above). In this instance both Entity “A” and Entity “B” remain as they are, with a new parent entity sitting above both entities.

Before

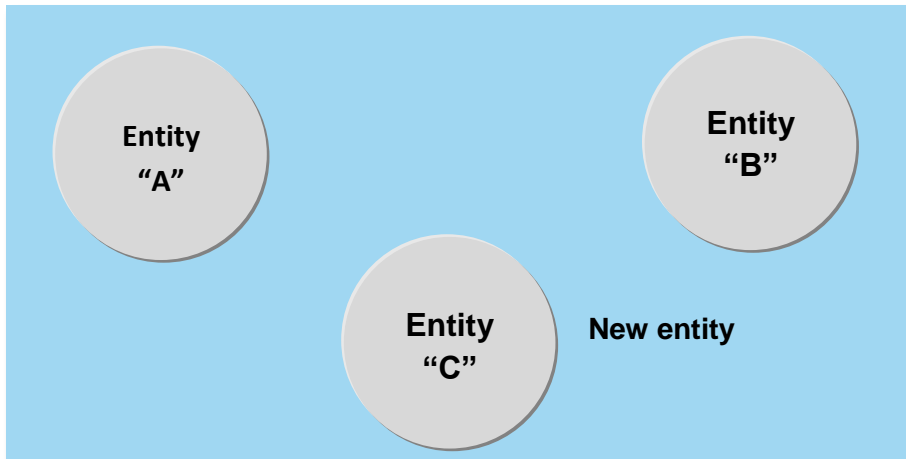

After

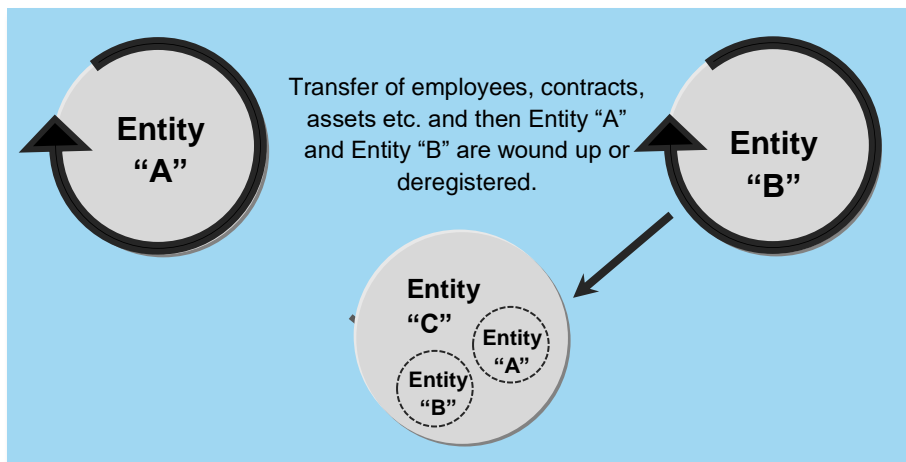

Option 4 – New entity and Entities “A” and “B” cease to exist

Create a new parent entity. Both Entity “A” and Entity “B” agree to transfer all of their property, employees, contracts, assets etc to the new entity, Entity “C”. Then Entity “A” and Entity “B” are wound up or deregistered.

Before

After

Option	1. Control	2. Funds	3. Identity	4. Ability to create economies of scale
<p>Option 1 – Entity “A” subsumed by Entity “B”</p>	<ul style="list-style-type: none"> Entity “B” could consist of a limited number of representatives from Entity “A”, so that Entity “A” could still retain some control over issues at Board level. Entity “B” would have complete control of every aspect of Entity “A”, as Entity “A” would be a part of Entity “B”. 	<ul style="list-style-type: none"> Entity “B” can tender for and negotiate contracts on behalf of Entity “A” as Entity “A” would legally be a part of Entity “B”. Entity “A” must transfer to Entity “B” any contracts it has. The funds of the two companies would be completely merged, but some Entity “A” monies could remain protected. This option would also mean that Entity “B” would assume responsibility for any liabilities of Entity “A” (both known and unknown). 	<ul style="list-style-type: none"> It is possible that Entity “A”’s brand could be subsumed by Entity “B”’s brand. However, with sufficient planning, it is possible for Entity “B”, on behalf of Entity “A”, to retain, protect and promote Entity “A”’s good brand name. Entity “B” register the Entity “A” name as a business name or trademark. Entity “B” may have a stronger influence in the relevant sector and generate more income due to the increase in size and developing a stronger brand. 	<ul style="list-style-type: none"> Entity “B” would be more powerful in lobbying Government due to its increased size. Entity “A” and Entity “B” could enjoy significant efficiency savings as they will be one organisation. Exploiting synergies. This structure would create opportunities to exploit links and contacts and to share knowledge and skills between Entity “A” and Entity “B”. Entity “B” would have greater authority with potential corporate donors or sponsors due to its larger size.
Option	1. Control	2. Funds	3. Identity	4. Ability to create economies of scale
<p>Option 2 – Entity “B” as subsidiary</p>	<ul style="list-style-type: none"> For Entity “A”, the Board structure and membership structure would remain the same. 	<ul style="list-style-type: none"> Entity “A” can tender for and negotiate contracts on behalf of Entity “B” as Entity “B” will legally be a part of the Entity “A” Group. It 	<ul style="list-style-type: none"> Entity “A” and Entity “B” would retain separate identities (including separate tax endorsements). 	<ul style="list-style-type: none"> Entity “A” would be able to lobby Government on behalf of Entity “B” as Entity “B” would legally be a part of the Entity “A” Group.

- For Entity “B” there are two options:
- Entity “A” could be the sole voting member and the other current members of Entity “B” could become non-voting members; or
- Entity “A” could be the sole member.
- As the sole/controlling member of Entity “B”, Entity “A” could dictate the membership of the board of Entity “B” (being mindful of shadow directorship issues).
- Entity “B” would still retain control over its operations, including programmes, employees etc.
- The constitution of Entity “B” could provide that any decisions made by the Entity “B” board could be made in the best interests of its parent, being Entity “A”.
- No contracts would need to be transferred from Entity “B” to Entity “A”.

could then distribute funds to Entity “B” pursuant to a subcontract.

- The funds of the two entities would remain separate. However, with appropriate changes being made to the Entity “B” constitution in certain limited circumstances, Entity “B” could pay dividends to Entity “A”.
- Lending institutions may require guarantees from Entity “A” before lending to Entity “B”.
- Entity “A” may need to lend capital to Entity “B” to fund Entity “B’s” operations (which could involve the payment of interest).
- This option would mean that Entity “A” would not assume responsibility for any liabilities of Entity “B” (both known and unknown apart from limited circumstances).
- Donations would be made separately to each entity.

- Entity “B” can retain its individual brand and reputation.
- At any time in the future, Entity “B” could still be subsumed into Entity “A” if it was considered to be worthwhile.

- Entity “A” and Entity “B” could enjoy significant efficiency savings. Administrative duplication can be reduced by centralising some of the administrative functions within Entity “A”. These administrative functions could be provided to Entity “A” for a reasonable fee.
- Exploiting synergies. This structure will create opportunities to exploit links and contacts and to share knowledge and skills between Entity “B” and Entity “A” as they are part of the same corporate group.
- Entity “A” and Entity “B” will maintain their existing authority with potential corporate donors or sponsors.
- This operating structure allows for greater diversification and increased efficiencies, partly because senior management in Entity “A” does not have to be involved in the operational details of Entity “B”.

Option	1. Control	2. Funds	3. Identity	4. Ability to create economies of scale
<p>Option 3 – New parent entity</p>	<ul style="list-style-type: none"> For Entity “A”, the Board structure would remain the same. The membership structure would have to change to allow the parent to become the sole (voting) member of Entity “A”. For Entity “B”, again the board could remain the same, but there would have to be changes to the membership structure to allow the parent to become the sole (voting) member of Entity “B”. Both Entity “A” and Entity “B” would have to negotiate with their current respective members to arrange for them to agree to resign from their membership, or at least cede voting control. As the sole/controlling member of both Entity “B” and Entity “A”, the new parent could dictate the membership of the boards 	<ul style="list-style-type: none"> Both Entity “A” and Entity “B” can continue to separately tender for and negotiate contracts. Alternately, the parent could tender on behalf of the entire group and then distribute funds to Entity “B” and Entity “A” pursuant to subcontracts. The funds of the two organisations would remain separate. However, with appropriate changes being made to the constitutions of both organisations, both Entity “B” and Entity “A” could pay dividends to the parent in certain circumstances. This option would mean that Entity “A” would <u>not</u> assume responsibility for any liabilities of Entity “B” (both known and unknown), and vice versa. 	<ul style="list-style-type: none"> Entity “A” and Entity “B” would retain separate identities (including separate tax endorsements). Each organisation can also retain its individual brands and reputations. However, all three entities could also be marketed as a single group. 	<ul style="list-style-type: none"> This structure would allow Entity “A” to attach other organisations in the future as additional subsidiaries. The new parent would be able to lobby Government on behalf of both Entity “B” and Entity “A”, as all three entities would legally be a part of the same group. Entity “A” and Entity “B” could enjoy significant efficiency savings. Administrative duplication could be reduced by centralising some of the administrative functions within the parent. These administrative functions could be provided to both Entity “A” and Entity “B” for a reasonable fee. Exploiting synergies. This structure would create opportunities to exploit links and contacts and to share knowledge and skills between Entity “B” and Entity “A” as they are part of the same corporate group.

of both Entity “B” and Entity “A” (being mindful of shadow directorship issues).

- Both Entity “A” and Entity “B” would still retain control over their respective operations, including programmes, employees etc.
- The constitutions of both Entity “B” and Entity “A” (if they are companies) could provide that any decisions made by the boards of either organisation could be made in the best interests of their new parent.
- No contracts would need to be transferred from either Entity “B” or Entity “A” to the new parent.

- Donations would be made separately to each entity.

- Entity “A” and Entity “B” would maintain their existing authority with potential corporate donors or sponsors.
- This operating structure would allow for greater diversification and increased efficiencies, partly because senior management in Entity “A” would not have to be involved in the operational details of Entity “B”.
- This structure would allow Entity “A” or Entity “B” to attach other entities in the future as additional subsidiaries.
- This structure would also allow the parent to attach other entities in the future as additional subsidiaries.

<p>Option 4 – New entity and Entities “A” and “B” cease to exist</p>	<ul style="list-style-type: none"> Entity “C” could consist of a number of representatives from Entity “A” and a number of representatives from Entity “B”. Contracts would need to be transferred from both Entity “A” and Entity “B” to the new parent entity. 	<ul style="list-style-type: none"> Entity “C” can tender for and negotiate contracts on behalf of Entity “A” and Entity “B” as Entity “A” and Entity “B” would legally be a part of Entity “C”. Entity “A” and Entity “B” must transfer to Entity “C” any contracts they have. The funds of the two entities would be completely merged into new entity. 	<ul style="list-style-type: none"> It is possible that Entity “A”’s and Entity “B” ’s brand could be subsumed by Entity “C”’s brand. Key Terms

Once it is agreed that the two entities will seriously investigate a merger, it would be beneficial for the entities to agree upon and sign an MOU to set out how they will relate to each other up to the time that they agree to officially merge. Once they agree to merge, the entities will then enter into a formal merger agreement.

The key points to be included in the MOU are as follows:

- 2.1 which merger option has been chosen (out of the four options set out above in this paper);
- 2.2 how long the entities will have to decide whether to proceed with the merger or not;
- 2.3 confidentiality – both entities would need to promise to keep any information collected about the other entity confidential;
- 2.4 what rights each entity has to conduct due diligence of the other entity;
- 2.5 how long the entities have to reach agreement on the merger agreement if they agree to merge;
- 2.6 what rights of access each entity has to the other entity's staff, records, programme materials etc;
- 2.7 who in each entity will be the main contact person;
- 2.8 the fact that each entity will be responsible for its own costs in conducting the due diligence (unless agreed otherwise);
